

# Bliss

ULTRA COMPACT 2 PORT KVM SWITCH WITH CABLES

## FEATURES

- ✓ Ultra compact KVM switch with integrated cable system
- ✓ Compatible with PCs (PS2 or USB) and Macs (USB only)
- ✓ Simple plug and play operation
- ✓ Secure and simple mounting system
- ✓ HotKey computer selection
- ✓ Programmable scanning between computers
- ✓ Full Keyboard and Mouse emulation
- ✓ Colour coded connectors
- ✓ Complete solution in one unit
- ✓ LED "computer selected" indicators
- ✓ Supports video resolutions up to 1920 x 1440

## OVERVIEW

Bliss offers a simple, fast, safe and economical way to control two computers from 1 keyboard, monitor and mouse. Bliss is a miniature "in cable" switch design which takes no desk space and can be easily and securely mounted by screw or cable tie for a secure and tidy installation. Bliss will allow connection of one computer with standard (PS2) type keyboard and mouse connectors, and one computer with either PS2 or USB connectors - the second computer can be a full sized computer, a notebook computer or a Mac.

Simply connect Bliss to your computers and to your keyboard, video monitor and Mouse and you are ready to go! Simple key commands switch you from one computer to the other, and LEDs on Bliss show you which computer is selected. Bliss electronically keeps alive the unused computer, and emulates keyboard and mouse for flawless booting of both computers at any time.

Bliss uses video enhancement technology to support high resolution video, giving you a clear and bright video image. When not using either computer, Bliss can be set to scan between the two computers so that you can monitor both for activity.
